Safe Strips with Buckle

SAFE STRIP bundling straps are convenient for multi-hose bundles and can be used over and over again. The width of the band is 25 mm and it is also woven with a white Safe-Strip text. Our strap has a taper cut edge for easy threading into buckle and a loop to hold the band end!

Part No.	Length	Width
	mm	mm
QRB-050	500	25
QRB-100	1000	25
QRB-150	1500	25

Safe Strip with Velcro

Safe Strips with or without a mounting eyelet are produced from polypropylene and have Velcro®-brand fasteners. Breaking strength average of Safe-Strip is 1500 N. The buckle is stainless steel and the width of the band is 40 mm.

The Velcro Safe Strips are available on Special Order Only

Safe Binding Straps

We have a range of Binding Straps which can be used for many different kind of purposes, for example for bundling of hydraulic hoses or electrical cables together. You can handle long and heavy hose bundles easier by strapping them before mounting spiral on the bundle. Our Binding Straps are made of very durable woven polyester (PES). All the straps have adjustment holes (except the smallest size, which is meant for bundling of electric cables). Tensile strength is 3000 – 4200N.

The Binding Straps are available on Special Order Only
